

Allison Brown
Superintendent of Schools

February 26, 2025

Dear Roslyn Families,

Roslyn Public Schools is committed to protecting the health and well-being of our students, teachers, and staff. In compliance with the New York State Department of Health regulation titled *Lead Testing in School Drinking Water* (10 NYCRR Subpart 67-4), we recently performed an updated inventory of all water fixtures districtwide. Testing was performed by J.C. Broderick & Associates, Inc., a certified environmental consulting and testing firm. As you may be aware, water fixtures were previously tested in 2016 and 2020. The latest tests indicated that only fifteen (15) locations exceeded ***the recently reduced*** action level of 5 parts per billion.

In accordance with this regulation and our remediation plan, these 15 fixtures were immediately removed from service. Each of these fixtures were either permanently dismantled or remediated and retested during the February recess. Today, I am happy to report that **no elevated lead levels exist within Roslyn Public Schools at fixtures used for cooking or drinking.**

For more details, please visit our website [or click here](#) to read the entire sampling report. If you have any questions please contact Assistant to the Superintendent for Administration & Special Projects Thomas Szajkowski at (516) 801-5450.

Sincerely,

Allison Brown
Superintendent of Schools
