

Target: Using NoodleTools to
Cite!

What does it mean to “cite” your sources?

Why is it important?

When you tell your reader where you found your facts, you will use a specific format called **MLA (Modern Language Association)**.

Once upon a time, as the story goes, there lived a beautiful young woman of modest rank and excellent manners, but no significant income to speak of, and a handsome young man of great rank, haughty manners, and an estate 'ten miles round'. The beautiful young woman and the handsome young man meet, his haughty manners improve, they fall in love, he proposes marriage, and, in the concluding pages, her very modest means are raised to his very great estate in an event that surpasses even the wildest dreams of her ambitious mother.

It is an irresistible story, so irresistible, in fact, that garbled accounts from the popular press flattered readers for three years and more with rumours that Jane Austen's text was not only being read for television, but was going to feature a male Mr. Darcy – as if Austen's economic restraint were not more complex, shaded, and, well, more passionate, than mere flesh. If sex were all there were to it, we've seen it before. But when the BBC camera turns its yearning gaze on Britain's Historic Houses, Castles, and Gardens, their vast acres smiling in the sunshine, their sweeping Capability Brown parks, the splendid house presiding over it all, then the blood begins to pump in earnest.

For the BBC executives, of course, the yearning gaze of the camera and the rising heart of the viewer are little more than tokens in their own game of consumer desire. Industry moguls care nothing for Pemberley and its ten miles round except as it attracts the consumer eye. Paradoxically, Jane Austen's position as a "viewer" of Pemberley is a consumer's point of view as well. If desire is most likely to afflict the viewer who is outside the gates, one who does not naturally belong within the charmed circumference of the Pemberley estate, that is to say, a person who could, if rejected, become an apprentice of such an estate, and who could, if accepted, contemplate becoming a consumer of it, then both Jane Austen and her readers qualify in *Pride and Prejudice*. In short, Pemberley exists as a consumer token in Austen's novels, even as it does for the BBC, but in a much deeper game of desire.

The Mishima Dynasty

The Mishima Dynasty ruled ancient China from 1100 B.C. to 830 B.C. During this period, they made several technological innovations that still affect us today. Their religion was based off a polytheism belief of many different Gods. Finally, the political structure at the time was designed to give all power to the ruling King.

Technological innovations made during the Mishima Dynasty continue to have an impact on modern society. One important invention they created were eyeglasses (McArthur 25). Fishermen would take glass that washed up on the shores of China, and polished them for months (McArthur 25). When they were perfectly smooth and clear, the fishermen would use the glasses to read or watch the sea from a distance (McArthur 26). Another innovation during this period was the use of bandages ("Technology in Ancient China"). Soldiers during the Mishima Dynasty would use tree sap to glue fabrics to their battle wounds ("Technology in

LIBRARY DATABASES: contain journal articles, magazine and newspaper articles, ebooks, video clips, photographs, infographics, government docs, etc.

The screenshot shows a web browser window with a citation tool overlay. The citation style is set to "MLA 8th Edition", which is circled in red. Below the dropdown, the citation text is displayed: "Back, L., Russ, K., Liu, Z., Inoue, K., Zhang, J., & Otto-Bliesner, B. (2013). Global hydrological cycle response to rapid and slow global warming. *Journal of Climate*, 26(22), 8781-8786. Retrieved from http://0-search.proquest.com.liucat.lib.liu.edu/docview/1462003010?accountid=12142". The citation text is also highlighted in blue. To the right of the citation tool, a "Cite" button is circled in red. The background shows a search results page for a document titled "Global hydrological cycle response to rapid and slow global warming".

Often, library subscription databases have a “citation” button which creates a citation for your works cited page. Don’t forget to choose MLA!

 Direct quotation

 Paraphrase or summary

"Note that rapid, anthropogenic-like warming systematically affects global water vapor differently than slow, paleoclimate-like warming. Anthropocene (modern day) global warming is associated with water vapor increases that look more like those due to CO2 doubling than those due to the slow, paleoclimate-like warming.."

Modern day global warming affects water vapor differently than warming occurrences that happened in the distant past. The rate in which CO2 is warming the climate differs from the slow warming of past climates.

Characters: 221/65535

 My ideas

Refutes the claim that global warming is a natural part of the Earth's patte warming from the last Ice Age.
