Target: Using NoodleTools to Cite!
What does it mean to “cite” your sources?

Why is it important?
When you tell your reader where you found your facts, you will use a specific format called MLA (Modern Language Association).
What is NoodleTools?

Electronic citation and organizing tool

• Create a **Works Cited** page (references, bibliography)
• In-text citations
• Organize your notes (virtual notecards)
• Create an outline

The Mishima Dynasty

The Mishima Dynasty ruled ancient China from 1100 B.C. to 830 B.C. During this period, they made several technological innovations that still affect us today. Their religion was based off a polytheism belief of many different Gods. Finally, the political structure at the time was designed to give all power to the ruling King.

Technological innovations made during the Mishima Dynasty continue to have an impact on modern society. One important invention they created were eyeglasses (McArthur 25). Fishermen would take glass that washed up on the shores of China, and polished them for months (McArthur 25). When they were perfectly smooth and clear, the fishermen would use the glasses to read or watch the sea from a distance (McArthur 26). Another innovation during this period was the use of bandages ("Technology in Ancient China"). Soldiers during the Mishima Dynasty would use tea sap to glue fabrics to their battle wounds ("Technology in
How to get to NoodleTools

• Links to NoodleTools can be found on the Library’s website. (Look for Academic Center on RHS homepage)

• Look for the “How do I cite sources?” tab on the left.
If this is your FIRST TIME signing in:
Username: [enter username]  
Password: [enter password]  

If you already registered last year, sign in using your school username and password.

rsmith22  
your school password

CLICK HERE If you are signing in for the FIRST TIME!
If you need to register:

Personal ID = School Username
Password = School Password
Last 4 digits = 5146
To Start:

Once logged in, click “+ New Project” which is a green button located on the top right corner.
Name your project
Choose MLA
Choose Advanced
The Dashboard is for project details and for sharing with group members and instructor.
SOURCES TAB is where you keep track of your sources—print, websites, and databases.
+ Create new citation (Green tab top left)
What kind of source are you going to cite?

Choose the best match

1.
FOR A BOOK: Type in the book’s ISBN number or the starred information
The ISBN is located opposite the title page (inside the book) or the back of the book.

</table>

View in: [WorldCat](#)
Check the information for accuracy and click “Submit”
LIBRARY DATABASES: contain journal articles, magazine and newspaper articles, ebooks, video clips, photographs, infographics, government docs, etc.
Often, library subscription databases have a “citation” button which creates a citation for your works cited page. Don’t forget to choose MLA!
You can also fill in the citation information manually. Fill in as much information as you can, especially the boxes marked with a red asterisk * That info is always listed with the article within the database.

L., Russ, K., Liu, Z., Inoue, K., Zhang, J., & Otto-Bliesner, B.
13). Global hydrological cycle response to rapid and slow global
warming. *Journal of Climate, 26*(22), 8781-8786. Retrieved from
Rapid global wa...
"Note that rapid, anthropogenic-like warming systematically affects global water vapor differently than slow, paleoclimate-like warming. Anthropocene (modern day) global warming is associated with water vapor increases that look more like those due to CO2 doubling than those due to the slow, paleoclimate-like warming."

Modern day global warming affects water vapor differently than warming occurrences that happened in the distant past. The rate in which CO2 is warming the climate differs from the slow warming of past climates.

Refutes the claim that global warming is a natural part of the Earth's patte warming from the last Ice Age.
Use NoodleTools to help you with citations. NoodleTools is a fabulous program to create and save your citations for every project.

Every student and faculty member may create an individual account and use NoodleTools through this link. Please see (or email) library staff for RHS user name & password required to create your account.

Special NoodleTools instructions
1. Directions to set up account and begin working on NoodleTools.
2. Directions to access citation database or other preformed citations in your NoodleTools project.
