

# APPLIED CHEMISTRY SYLLABUS

## General

This class offers students an introduction to the Chemistry curriculum that addresses the specific learning needs of each student. It focuses on the main topics of the subject and allows students to get an introduction through observation and experience. Utilizing the grading system below and hands-

on activities, the curriculum is designed to provide students with valuable learning experiences while tapping into the diverse learning styles of each student. There are many responsibilities that each student is expected to fulfill this year in General Chemistry, including lab reports, homework, tests and quizzes, an organized notebook, utilizing an assignment book, and being prepared each day to learn.

## Grading:

Your marking period grade will be determined by computing the following categories and their weights below:

<b>Assessments</b> .....	30%
<b>Labs</b> .....	30%
<b>Classwork/Homework</b> .....	30%
<b>Participation</b> .....	<u>10%</u>
	100%
